---

Mr. Rosenzweig: Pursuant to your request, I have made inquiries into the conduct of a number of City staff relative to their interactions with you and your family in 2014. I have reviewed your written submissions, and consulted with the Director of Planning and Code Administration and members of both the Neighborhood Services and Animal Control divisions. I've determined that it is appropriate to reinforce to the supervisors of these divisions that interaction by City staff, with all residents, should always be conducted in a respectful and courteous manner.

The City's Code Enforcement functions are key to maintaining the quality of life our residents have come to expect and our code enforcement officers respond to all complaints received. To that end, however, I have spoken with many residents over the years who acknowledge to the prospect of official action against them can be disconcerting. I understand that City staff has not visited your property since November of 2014. If, in future, such action is again deemed necessary, I will communicate my expectations to staff.

---
